

Ref-013 Fuel Grade Decal Signage (Film Type)

Right view

Fuel Grade Decal Signage
Column 700

Fuel Grade Decal Signage
Column 600

Unit: mm

Fuel product indicator signs should be placed on the customer-facing side of the column, with the height from the fuel island top to be 1250mm, and the height from the fuel island model top to be 645mm, centered vertically and horizontally.

Fuel product numbers should be arranged from high to low as follows: 98, 95, 92, with diesel at the bottom.

The fuel product numbers shown in the diagram are for reference only and should be selected according to actual conditions. Filling stations generally use Film-type fuel numbers.
